

The heatmap displays the distribution of 1000 data points across 10 rows and 7 columns (Monday to Sunday). The color scale ranges from dark purple (low density) to bright yellow (high density). The distribution is highly irregular, with many cells showing zero density (dark purple) and others showing high density (yellow). Notable high-density areas include the top row (Monday-Saturday), the second row (Monday-Saturday), and the third row (Monday-Saturday). The bottom row (Monday-Saturday) shows a high density of zero-density cells (dark purple).
